CONSCIENCE  
INTERNATIONAL

## WHERE WILL YOUR CONSCIENCE TAKE YOU NOW?

**T**hese are the programs and the places where Conscience International teams have successfully lifted up thousands of families over the past 12 months (and over the past 34 years) thanks to your belief in our work in difficult and sometimes dangerous places.

There are people in Africa, Latin America, SE Asia, and parts of the Middle East whose names you don't know but whose lives and situations you can change.

Every program is rooted in our commitment to serve with compassion, restore dignity, build futures and reflect God's love through Faith in Action.

The numbers aided tell a measurable story, but behind each number is a life transformed. At year end, and in this season of giving and love, our teams and staff leaders want to thank you for the hope and aid you have given through your compassion and donations.

**Read on for just some of the ways you have made an impact on many lives this year.**

Supporting Education in poor villages

Medical and Surgical Clinics

Gathering Malnutrition Data

## You Can Make a Lasting Difference... in Guatemala, Venezuela, Colombia

- This year our teams are supporting development initiatives that go beyond short-term relief by creating sustainable solutions for low-income families (housing, agriculture projects for self-support)
- In some of the most remote, difficult to reach areas, our medical team has provided programs of primary care, dental treatments, surgeries and nutritional support where there were none at all.
- Reinforced long-term relationships by establishing and monitoring scholarship programs as a beacon of hope for children in poverty, giving them confidence to set life goals; rescued survivors of human trafficking and from city garbage dumps and sent them to school. None have returned to unsafe environments.
- **Challenge going forward:** We want to expand our outreach through partnerships and establish a larger, more sustainable remote clinic that can serve more people in desperate need of healthcare.

Widows celebrating gifts of goats

## You Can Make a Lasting Difference... in Benin, West Africa

- With just one donor contribution in memory of a friend, 20 widows in Benin, West Africa each received two healthy goats this year to raise for goat reproduction as a sustainable source of food, for milk, goat sales and income, providing support for themselves and their children.
- To assure sustainability, each goat was carefully selected by a vet, quarantined and monitored for one month to assure they were healthy.
- A second phase of training for widows included in-depth instruction on food composition, appropriate care and reproductive management of goats, health monitoring and advisor support.
- **Challenge going forward:** To expand the program to other regions so more widows become self-sufficient for financial security—many of them have young children to support.

# You Can Make a Lasting Difference.... in Congo, Central Africa

- In a country of 113 million people where road accidents are common, wars rage, and healthcare is limited, one donor recognized the need for emergency medical care, made a contribution and launched a funding drive.
- The result is the first emergency medicine academic program for doctors and nurses in Congo located at Heal Africa Hospital—the first ever emergency program in that country.

Doctors and nurses who had never had emergency medicine training before this year are now proficient in immediate critical care in addition to their regular medical responsibilities.

- The result of this training has been a reduction in the rate of 24-hour mortalities in both emergency situations as well as in the general hospital population.
- **Challenge going forward:** To open emergency training centers in other

Child care at Heal Africa Hospital

African countries and seek funding for basic equipment.

At our school for village children, a hot nutritious meal may be the only one they get each day

# You Can Make a Lasting Difference... in Bangladesh, SE Asia

In a poor village where no school had ever existed, Conscience International built one in 2012 and a second building followed where both Christian and Muslim children now coexist in classroom harmony from first through the fifth grade. From an initial enrollment of 80 to the 2025 enrollment of 260, the school continues to grow with parents and the community fully participating in its success.

- Your contributions have provided more local, qualified, dedicated teachers and staff, nutritious meals for the students, and a newly established school library.

- 30 new students in 2025; 23 students graduated to go on to a nearby high school; 11 children, who were among the first students a decade ago, have graduated from high school and are now in college, an achievement and opportunity they would never have had without the school giving them their start.
- **Challenge going forward:** Keeping good teachers with appropriate, life-sustaining salaries; providing more educational programs; accommodating a growing school enrollment, providing hot meals.

## Where In The World Will Conscience Take You Next?

A personal message from

Dr. James Jennings, President  
Conscience International  
conscience@earthlink.net

With Federal and international aid programs being greatly reduced this year, and war and starvation expanding, the people we serve need your help more than ever.

Please consider making a tax-deductible gift that will make a difference in people's lives. Their needs are critical.

It is wonderfully rewarding to discover that simple gifts bring such gladness into the lives of people waiting for food or health care where none exists until our teams arrive. Most recently our medical team of volunteer physicians and medical students in Guatemala and Columbia returned joyfully because they made a difference in more than 1,000 people's lives. In every country we find people waiting in long lines. They are always grateful that we are there to help.

Why we do what we do in places from Bethlehem to Bangladesh is the satisfaction of reaching and helping hurting people suffering from emergencies, often in places where no one else will go. Seeing refugee children in times of war is especially heart-rending.

I marvel at how much has been accomplished over the years through faithful donors. This year of 2025 is especially challenging. Your caring and sharing via donations at year's end can accomplish much that people are anxiously waiting for us to do.

Thanksgiving and Christmas are year-end markers of people's generosity. The holidays offer each of us an opportunity to thank God for our blessings and share with others who are not as fortunate.

## We're Making a Lasting Difference by being there with...

**Shelter** for families suffering through natural disasters

**Medical and Surgical** aid in regions where none exists

**Community Development programs** for supportable family provision

**Refugee care, comfort, and support** for families fleeing wars in their homelands
